## Technical Skills

### Programming Languages

- C++
- C
- JavaScript
- Python

### Operating Systems

- Windows
- Ubuntu

## Education

- 2012-2015 **Simon Fraser University**, *Master of Science, Computing Science*, Canada.  
Courses: Design/Analysis Algorithms, Machine Learning, Data Mining, Geometric Modelling in CG, Natural Lang.Process
- 2007-2012 **Zhejiang University**, *Bachelor of Engineering*, China.

## Industrial Experience

- Mar 2015 - **SAP**, *Software Development Engineer*, Palo Alto, CA.  
Current
  - Developed applications on SAP HANA and SAPUI5 using JavaScript, ABAP, and SQLscript.
- Jan-Apr 2014 **Microsoft**, *Software Development Engineer*, Vancouver, Canada.
  - Participated in the development of a web-based dashboard for Xbox data analysis;
  - Used JavaScript and C#.
- Jul-Sep 2011 **Alibaba.com**, *Test Engineer*, Hangzhou, China.
  - Participated in the development and test of the search engine, and conducted unit test, code review, and document maintenance;
  - Used C++, Linux, and Shell.

## Programming Projects

- May 2015 **Commodity Management System for Cargill Inc**, *SAP*.
  - Developed a database system for the commodity pricing engine;
  - Designed a web UI using JQuery, D3.js, and SAPUI5;
  - Written in ABAP, SQL, and JavaScript.
- Jan-Apr 2014 **Web-based Dashboard System for Xbox Statistics**, *Microsoft*.
  - Designed a dashboard system for testing on Xbox statistics and analyzing user activities;
  - Connected the system with Splunk data source and Microsoft Azure;
  - Written in HTML5, JavaScript, and C#, used libraries such as D3.js.

---

## Programming Projects (Continued)

- 2012-2014 **Web-based Configurable Dashboard Platform for ROS**, *Autonomy Lab, Simon Fraser University*.
- Designed a platform for Roboticists to test and demonstrate with various widgets in browsers, including 2D/3D map, data plotting, etc;
  - Written in HTML5, JavaScript, and PHP;
  - Dashboards can be created by dragging and dropping, which is easy to use, simple to extend, and welcomed by Roboticists.
- 2010-2011 **RoboCup Small-size League**, *Zhejiang University*.
- Developed path planning algorithm, designed the soccer defence strategy, and reconstructed original code into scripted code;
  - Won the Final Eight in RoboCup World Competition, and the Second Prize in RoboCup China Competition;
  - Written in C++, used VisualStudio to develop, and TortoiseSVN for version control;
  - Improved the team's defensive ability and reduced the component's goal rate;
  - Simplified the process of changing parameters on-site by reconstructing into scripts.

---

## Research Projects

- 2011-2012 **Intelligent Security Patrol System based on NI DaNI Mobile Robot Platform**, *Zhejiang University*.
- Worked on National Instruments Robotics Starter Kit and LabVIEW;
  - Designed a patrol system based on network camera and VFH path planning algorithm;
  - Won the Second Prize in NI National Academic Paper Contest and Excellent Graduation Thesis.

---

## Honors and Awards

- Jun 2012 Second Prize in NI Academic Paper Contest  
Jun 2012 Excellent Graduation Thesis  
Jul 2011 Final Eight in RoboCup World Competition  
Aug 2011 First Prize of Research and Creation Scholarship  
Jul 2010 Second Prize in RoboCup China Competition  
May 2010 Championship of Standard Platform Match, Supcon Cup Robotics Competition  
Sep 2008 Excellent Academic Scholarship
